

Immudex Nominated for the Gazelle Company Awards 2018

Danish Business Newspaper “Børsen” has identified Denmark's growth companies – The Gazelles – every year since 1995. In 2018, Immudex has joined this prestigious group of companies by being nominated “Børsen Gazelle 2018.” A Gazelle Company grows continuously and, as a minimum, doubles its revenue or gross profit over four fiscal years.

On 5th December 2018 Immudex was awarded 4th place in the Capital region. 2113 other companies were nominated in total across the 5 Danish regions.

At Immudex, we are both proud and happy to be selected as a gazelle company, which shows that our business strategy and value base carry on. We take pride in manufacturing our products to a high-quality standard, provide the best possible customer service and support as well as joining in mutual partnerships with other companies in the life science industry, to create value to all involved, and in the end to our customers and ultimately the patient.

We are grateful for this acknowledgement and thank our customers, partners and especially employees for making it possible for Immudex to reach this milestone.
